

June 2024

The Movement's Trust is two years old!

We started operating as a values-driven champion of social movements in 2022 - offering regranting and charitable sponsorship to enable funds to reach movements more easily

We now have 76 movements in our family, and have already transferred **£1 MILLION** in accessible funding.

Our Movements ...

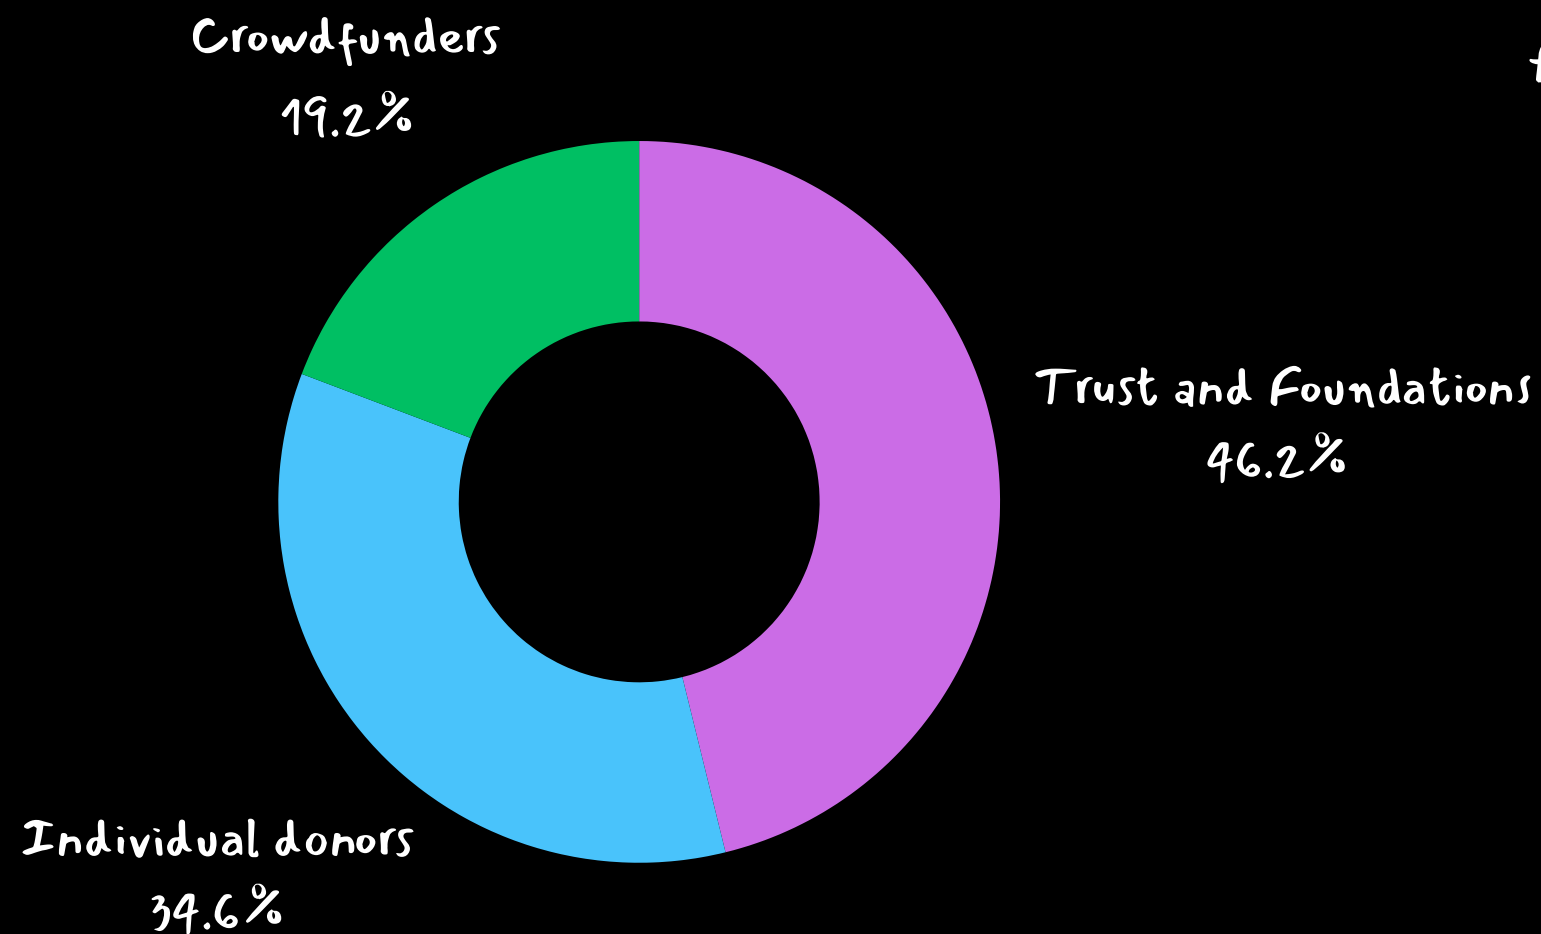

We have developed a unique, values-driven service we call **charity (or fiscal) sponsorship**

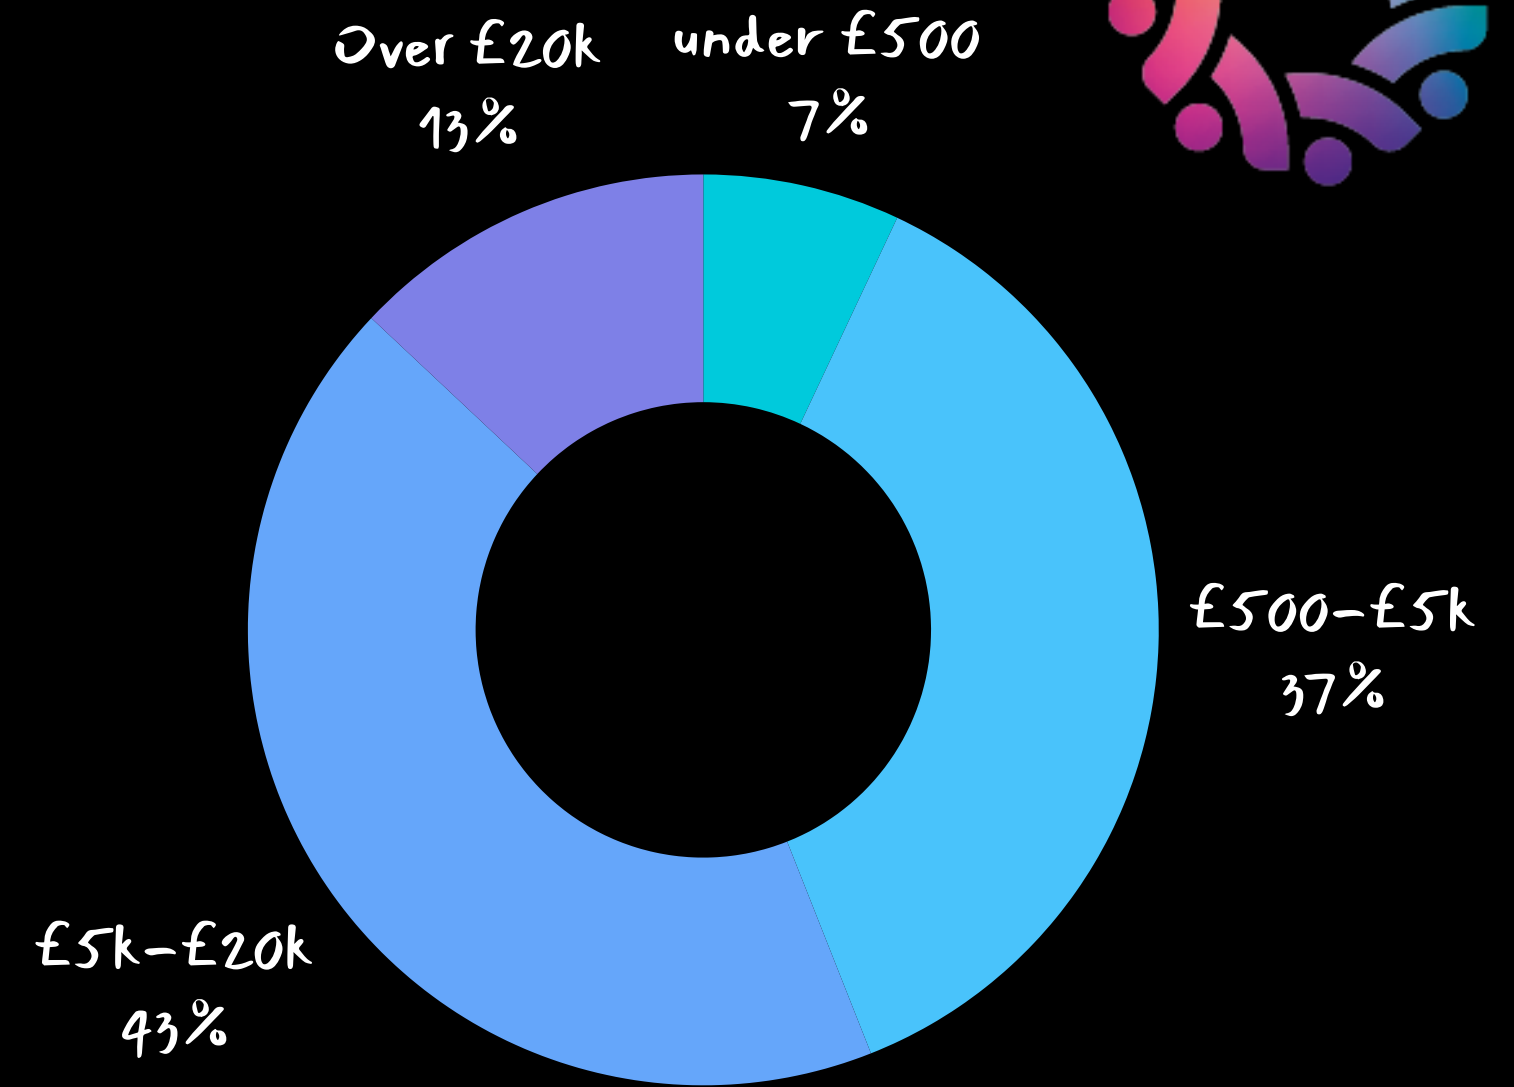

We share our charitable status with movements so that they are eligible for funding restricted to charitable entities – and for individual donors, we can claim Gift Aid on behalf of the movement.

In 2023–24 we extended this sponsorship to crowdfunders:

Donor Type

Sponsored Grant Size

It's a different service to fiscal hosting but we refer movements to our trusted partners if they need this form of ongoing support.

We have developed our expertise as a **movement-aligned re-granter**, delivering grant making that aims to meet the needs of movements rather than donors

So far we have regranted £500,000 to movements using **co-produced methodologies** with movements using priorities and procedures that they define

We use learning and trust based approaches when we distribute grants.

Our Grantmaking Principles

- Rapid movement of funds – we have succeeded in our ambition to get money into the hands of movements within a month
- We convene movements in skill sharing workshops to report on activity, so their time is used to help them, and not us.
